

Computer Careers Web Hosting

Information Sheet

Summary

All web programming students at South Central College are given a web hosting account that they can use as part of their studies. This information sheet will show you how to use this resource to publish your web pages.

Our web hosting features CPanel, a popular interface used by many web hosting companies on the Web. cPanel gives you the ability to set up and MySQL databases, set passwords, and FTP to your site.

Login Information

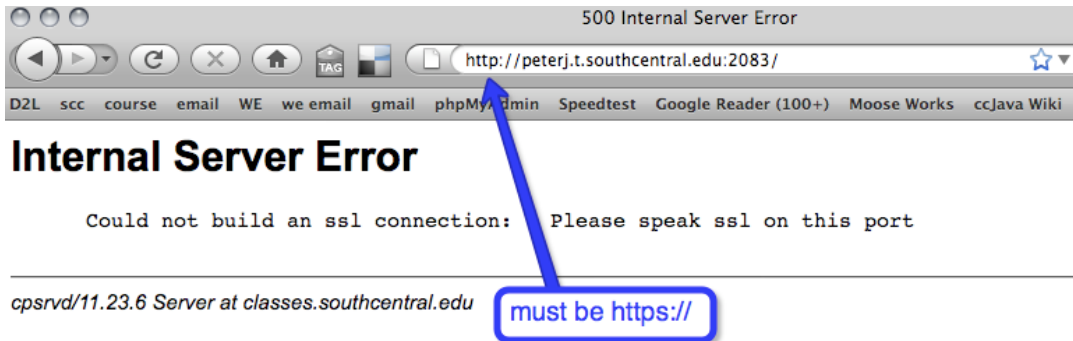

To view your website: `http://firstnameLastinitial.t.southcentral.edu`

To access your cPanel: `https://firstnameLastinitial.t.southcentral.edu:2083` (note the `https` - this uses a **secure** http connection)

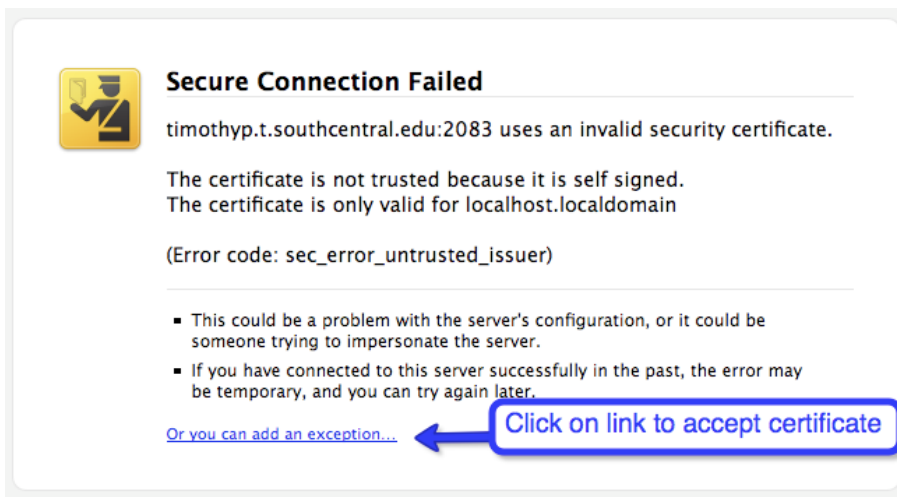

Your user name: The first 8 letters (or less if your name is shorter) of your `firstnameLastinitial` (Using your name as listed in the MnSCU class rosters and your DARS report)

Your password: Your student id including leading zeros

If you get an Internal Server Error page it means you left the 's' off of the `https://` protocol:

If you get a Secure Connection popup and error page, click on the link at the bottom of the page and use the wizard to accept the certificate:

When successful your cPanel will look something like this:

The image shows the cPanel VPS Optimized interface. At the top, there's a header with the cPanel logo and "VPS Optimized" text. Below the header, the interface is divided into several sections:

- Switch Theme:** A dropdown menu showing "x3".
- Switch Account:** A dropdown menu showing "peterj.t.southcentral.edu (peterjt)".
- Find:** A search bar.
- Frequently Accessed Areas:** A list of links: phpMyAdmin, File Manager, MySQL® Databases, Image Manager, and FTP Accounts.
- Stats:** A section showing various statistics:
 - Main Domain: peterj.t.southcentral.edu
 - Home Directory: /home/peterjt
 - Last login from: 24.197.207.76
 - Disk Space Usage: 0.61/2048 MB
 - Monthly Bandwidth Transfer: 0.02/2048 MB
 - Subdomains: 0/0
 - Parked Domains: 0/0
 - Addon Domains: 0/0
- Preferences:** A section with icons for: Getting Started Wizard, Video Tutorials, Change Password, Update Contact Info, Change Style, Branding Editor, and Change Language.
- Mail:** A section with a "Default Address" icon.
- Files:** A section with icons for: Backups, Backup Wizard, Legacy File Manager, File Manager, Disk Space Usage, Web Disk, FTP Accounts, FTP Session Control, and Anonymous FTP.

FTP to Your Site

FTP/Website address: *firstnameLastinitial*.t.southcentral.edu

User Name: *firstnameLastinitial*

Password: your student ID including leading zeros

FTP Port: 21

You must put all files and graphics in the **public_html** in order for the browsers to find them.

Here is a shot of the FileZilla FTP program showing the client and the server side as well as where to put your files on the server side.

Command: PASV
Response: 227 Entering Passive Mode (134,29,223,19,197,214)
Command: LIST
Response: 150 Accepted data connection
Response: 226-ASCII
Response: 226-Options: -a -l
Response: 226 5 matches total
Status: Directory listing successful

Local site: /Library/WebServer/Documents/ccHosting/

Remote site: /public_html/

Files on your computer

Files on the server

Put your files in here.

Your home page

The screenshot shows an FTP client window. At the top, a command log displays the session details. Below, the 'Local site' pane shows a directory tree with 'ccHosting' expanded, revealing 'graphic', 'drupal6', and 'flexProiect' folders. A table below lists 'index.html' as a 240-byte HyperText file. The 'Remote site' pane shows a similar tree with 'public_html' expanded, listing various system folders and 'index.html'. Annotations with arrows point to the 'public_html' folder and the 'index.html' file, with text boxes explaining their roles.

Filename	Filesize	Filetype	Last
..			
graphic		Folder	10/...
index.html	240	HyperText	10/...

Filename	Filesize	Filetype	Last
..			
cgi-bin		Folder	09/...
graphic		Folder	10/...
index.html	240	HyperText	10/...
